

SDG Summer School: Planetary Health

From 1 to 26 July 2024

SDG Solution Space, Campus Biotech Innovation Park

*“Completely out of my world!
Because it showed me what I have
not seen before. I learned about
entrepreneurship, gained confidence
to pitch & to speak, made new
friends around the globe”*

TARGET AUDIENCE

Bachelor and Master's students interested in sustainable development and global health issues related to the United Nations Sustainable Development Goals (SDGs).

TUITION FEES

External students: CHF 2,100

UNIGE students: CHF 400

COURSE DESCRIPTION

The theme of the 2024 edition of the SDG Summer School is “Planetary Health” with a focus on the impact of climate change on human health. The school lasts four weeks, from Monday 1 to Friday 26 July. The format is hybrid, with teams working locally in the SDG Solution Space, an innovation space for students in the heart of International Geneva, while collaborating online with other SDG Summer Schools that are part of a global SDG Olympiad.

The 4-week program of the SDG Summer School focuses on team-based problem-solving. The agile development of practical prototypes, including weekly pitching sessions to a diverse jury, is inspired by concrete challenges formulated by experts from the International Organizations in Geneva.

COURSE CREDITS

Students will be provided with a Certificate of Completion from the Geneva Summer Schools at University of Geneva, stating the course is worth 6 ECTS.
